

NORDIHYDROGUAIRETIC ACID

RESEARCH SUMMARY

This component of some plants has been shown to have anticancer properties for skin and may also protect the skin from sun damage (Sources: British Journal of Cancer, April 2002, pages 1188-1196; Molecular Carcinogenesis, June 2002, pages 102-111; and Biochemical Pharmacology, March 2002, pages 1165-1176).
